Core Capabilities

Labour Hire for Government Analytics Teams

Certified Azure Databricks consultants available for embedded roles across Commonwealth and State departments. APS-aligned, outcome-focused, and delivery-ready.

Migration of Legacy Workflows

Translation of SAS, R, and Excel workflows into governed, reproducible Azure Databricks notebooks and pipelines – with zero disruption to delivery.

Data Engineering Enablement

Design and implementation of secure, scalable ETL pipelines, reporting automation, and model deployment using Azure Databricks.

Data Science Enablement

Cloud-native solutions for predictive modelling, exploratory analysis, and statistical workflows – engineered for reproducibility and scale.

DATA FRIENDS

Key Differentiators

- Exclusive Azure Databricks focus
 - Deep government procurement and compliance understanding
 - Embedded delivery model for rapid integration
 - Reproducibility by design – CI/CD-enabled, auditable solutions
 - Queensland-based, with national reach
-

Delivery Model

- Embedded consultants integrated within agency teams
 - Modular, auditable, and reproducible solutions
 - CI/CD-enabled workflows for continuous delivery and compliance
-

Client Experience

Department of Agriculture – Secure Databricks enablement, CI/CD, ML workflows

National Skills Commission – ML pipelines, analytics team uplift
